

Security Services

Addressing & tackling your security needs no matter the size or complexity

Versetal goes beyond the traditional role of a technology solutions provider; we position ourselves as your Managed Security Services Provider (MSSP), offering a holistic approach to cybersecurity. Unlike other vendors, we don't just alert you to threats – we stand by your side, actively combating cyber threats alongside your team. Our Security Operations Center (SOC) is dedicated to Managed Detection and Response (MDR), Security Information and Event Management (SIEM), Incident Vulnerability Management (IVM), and Cloud Security (CloudSec). Additionally, we offer optional virtual Chief Information Security Officer (vCISO) advisory support to further strengthen your cybersecurity posture.

Security Service Offerings:

24/7 Security Operations Center (SOC): Versetal's SOC provides continuous monitoring and threat detection, ensuring the security of your digital assets around the clock.

- **MDR/EDR (Endpoint Detection and Response):** Enhance endpoint security with proactive threat detection and response capabilities.
- **SIEM (Security Information and Event Management):** Utilize advanced SIEM technologies to aggregate and analyze security data, enabling real-time threat detection.
- **IVM (Incident Vulnerability Management):** Swiftly respond to and manage cybersecurity incidents, minimizing potential damage.
- **Dark Web Monitoring:** Continuously monitor the dark web for potential threats and compromised credentials.
- **IDM (Identity Management):** Implement robust identity management solutions to control user access and enhance security.
- **SSO (Single Sign-On):** Streamline authentication processes with secure single sign-on solutions.
- **MFA (Multi-Factor Authentication):** Add an additional layer of security with multi-factor authentication to protect against unauthorized access.
- **SAT (Security Awareness Training):** Educate and empower your workforce to recognize and mitigate security threats.

Threat Exposure Management: Leverage advanced tools and expertise to manage and respond to cyber threats effectively, minimizing the impact on your business.

Penetration Testing: Identify vulnerabilities in your systems through rigorous Pen Testing, allowing you to proactively address potential security risks.

CloudSec: Secure your cloud infrastructure with Versetal's CloudSec services, offering robust protection for data stored in cloud environments.

vCISO Advisory: Benefit from expert virtual Chief Information Security Officer (CISO) advisory services to guide your organization in making informed cybersecurity decisions.

“Versetal’s security services were an absolute game-changer for our organization. They didn’t just protect us from threats; they saved our sensitive data when it mattered most. For instance, when faced with a sophisticated phishing attack, their Security Operations Center swiftly detected and neutralized the threat before it caused any damage. Their proactive approach and expert guidance truly elevated our security posture, giving us peace of mind in today’s ever-evolving threat landscape.”
